

JELCO Flat Screen Padded Covers

JELCO flat screen padded covers are constructed of black nylon fabric, which is backed, with 1/2" of industrial grade foam. The interior of the foam is covered with a soft flannel fabric to prevent scratching face of the monitor.

Covers are designed to fit very snug around the monitor and are held in place with a velcro fastener at the bottom edge.

Suggested applications include covering monitor when mounted on a stand (prevents scratching front glass surface when moved through doorways), at trade shows during set-up and teardown or for general protection when not in use.

JELCO Large Flat Screen Padded Covers are available for 32"-70". Other sizes can be accommodated as a custom cover.
